Global Food Market Statistics

World Food Market

Global food commodity markets are broadly stable, supported by adequate supplies. Market prospects remain favorable also for 2016/17. World cereal production in 2016 is anticipated to fall slightly short of projected demand in 2016/17, which would bring global end-of-season inventories in 2017 somewhat below their near record 2016 level. Supply prospects improved in recent months, on larger than earlier projected stocks at the beginning of the 2016/17 marketing season and more buoyant expectations about 2016 production.
